BRITISH CORROSION JOURNAL

U. of ILL. LIBRARY
MAY 1 - 1972
CHICAGO CIRCLE

CUMULATIVE INDEX VOLS 1 - 5 1965 - 1970

British Joint Corrosion Group, 14 Belgrave Square, London, SW1

The first 5 volumes of *British Corrosion Journal* were completed with the November issue, 1970. The complete set of back numbers together with this cumulative index is available, price £39.50, from the Chemical Society Publications Sales Office, Blackhorse Road, Letchworth, Herts, U.K.

AUTHOR INDEX

Numbers in bold type refer to the Volume, and the other numbers to the page within that volume

A

Acock, G. P. Protection of ship's bottoms— a review **1** 129
Agabio, G., & Tamba, A. Study of 'deposit corrosion' of stainless steels in aggressive atmospheres **5** 112
Ailor, W. H. Five-year corrosion of aluminium alloys at several marine sites **1** 237
Alderton, J. R. *See* Owen, L. W. ... **5** 217
Ali, S. I., & Wood, G. C. Oxidation of iron at room temperature **4** 133
Andrew, J. F., Donovan, P. D., & Stringer, J. Fretting corrosion products of aluminium alloys... ... **3** 85
Antill, J. E., Peakall, K. A., & Warburton. J. B. Oxidation behaviour of some nickel base alloys in carbon dioxide at 900–1000° **3** 85
See Jepson, W. B. **1** 15
Arnold, B. *See* Rollins, V. **5** 33
Aubrun, P. *See* Rocquet, P. **5** 193

B

Bagshaw, N. E., Feeney, J. R., & Harris, M. R. Thermal oxidation of lead powder **4** 301
Baker, R. G., & Whitman, T. G. Practical corrosion problems in relation to welded joints. I. Special characteristics of the welding process which can cause corrosion problems ... **2** 34
Practical corrosion problems in relation to welded joints. II. Corrosion problems in design **2** 41
Balakrishnan, K. *See* Sathianandhan, B. **5** 270
Barker, W., Evans, T. E., & Williams, K. J. Effect of alloying additions on the microstructure, corrosion resistance and mechanical properties of nickel–silicon alloys **5** 76
Bateman, G. J., & Rolls, R. Structure and adhesion of oxide scales on iron-aluminium alloys **5** 122
Baudo, G., & Tamba, A. Thermodynamics of iron-fused sulphate systems **4** 129
Bayley, F. H. Protection of equipment in storage and transit by sealed flexible covers **5** 247
Beard, F. M., & Hine, R. A. Effect of alloying constituents in aluminium on the corrosive attack by mercury **1** 98
Bell, Winifred, A., & Campbell, Hector S. Aluminium in fresh waters ... **1** 72
Bentley, M. N., *See* Rowlands, J. C. ... **2** 92
& Denham, A. G. A simple laboratory potentiostat **5** 227
Betteridge, W., & Lewis, H. Oxidation of three grades of 80–20 nickel/chromium wire **3** 197
Beynon, J. G. *See* Brasher, Dora M. ... **2** 195
5 264
Birks, N. Note on transport in porous scales and the simultaneous oxidation and carburisation of stabilised steels in carbon dioxide **3** 56
Board, J., & Winterborne, R. Oxidation of austenitic stainless steel boiler tubing in carbon dioxide ... **4** 86
See Stevens, C. G. **4** 80

Board, P. W., & Holland, R. V. Inhibition of nitrate-induced corrosion of tinplate cans **4** 162
& Britz, D. Solid electrode chronopotentiometry for studying the reaction of erythrosin on tinplate ... **3** 31
Dithiocarbamates, carbon disulphide and the corrosion of tinplate **3** 238
Bom, P. R. Selection of alloys for multistage flash distillation plant. ... **5** 258
Bombama, G. *See* Giuliani, L. **5** 179
Bonner, P. E., & Stanners, J. F. Protection of steel by metal spraying: a review **1** 339
See Stanners, J. F. **2** 242
Booth, F. F. Corrosion of mechanical joints in aluminium and aluminium-steel structures **2** 55
Murray, G. A. W., & Godard, H. P. Corrosion behaviour of aluminium in fresh waters with special reference to pipelines ... **1** 80
Booth, G. H., Cooper, A. W., & Cooper, Pamela, M. Criteria of soil aggressiveness towards buried metals. II. Assessment of various soils ... **2** 109
Cooper, A. W., Cooper, Pamela M., & Wakerley, D. S. Criteria of soil aggressiveness towards buried metals. I. Experimental methods **2** 104
Cooper, A. W., & Tiller, A. K. Corrosion of mild steel in the tidal waters of the Afon Dyfi and a comparison with the River Thames **2** 21
Criteria of soil agressiveness towards buried metals. III. Verification of predicted behaviour of selected soils **2** 116
Corrosion of mild steel in the tidal water of the Thames Estuary. III. Results of 3 and 5 years immersion **2** 222
Cooper, Pamela M., & Wakerley, D. S. Corrosion of mild steel by actively growing cultures of sulphate-reducing bacteria. The influence of ferrous iron **1** 345
Elford, Lynette & Wakerley, D. S. Polarisation of mild steel in the presence of hydrogen bacteria and methane bacteria **3** 68
Corrosion of mild steel by sulphate reducing bacteria: an alternative mechanism **3** 242
Brasher, Dora M. Logarithmic film growth in two successive environments: analysis of growth curves ... **1** 183
Stability of the oxide film on metals in relation to inhibition of corrosion. I. Mild steel in presence of aggressive anions **2** 95
Stability of the oxide film on metals in relation to inhibition of corrosion. II. Dual role of the anion in the inhibition of the corrosion of mild steel **4** 122
& Beynon, J. G. Influence of surface preparation on the kinetics of film growth on mild steel in chromate solutions **2** 195
Beynon, J. G., Rajagopalan, K. S., & Thomas, J. G. N. Passivity of iron in chromic acid solutions. ... **5** 264
De, C. P., & Mercer, A. D. Film growth on mild steel in inhibitive solutions **1** 188
& Mercer, A. D. Comparative study of factors influencing the action of corrosive inhibitors for mild steel in neutral solution. I. Sodium benzoate **3** 120
Reichenberg, D., & Mercer, A. D. Comparative study of factors influencing the action of corrosive inhibitors for mild steel in neutral solution. IV. Mechanism of action of mixed inhibitive and aggresive anions **3** 144
& Rhoades-Brown, J. E. Sodium *dodeca*-molybdophosphate as a corrosion inhibitor in aqueous solution **4** 74
Britton, S. C. Electrochemical assessment of chromium in passivation films on tinplate **1** 91
Oxide films formed during chemical polishing of steels **1** 317
& Hancox, J. H. Isolation of the coating layers of tinplate ... **1** 120
See Cotton, J. B. **1** 327
Britz, D. *See* Board, P. W. ... **3** 31, 238
Brown, G. J., & Treadaway, K. W. J. Low friction hydraulic cylinder for stress-corrosion testing **4** 166
Bruce, D., & Hancock, P. Note on the temperature stability of wüstite in surface oxide films on iron **4** 221
Bryde, R. Temporary protectives for preventing corrosion of plant and machinery **5** 252
Bullett, T. R., Rudram, A. T. S., Martin, S., & Wallace, R. J. Note on instruments for measuring roughness and cleanliness of blast cleaned steel ... **2** 129
Burr, D. J. *See* Evans, T. E. **1** 192
Butler, G., & Stroud, E. G. The influence of movement and temperature on the corrosion of mild steel. III. Chloride solutions **1** 110

SUBJECT INDEX

Numbers in bold type refer to the Volume, and the other numbers to the page within that volume

A

Absorption; ——— of anions on iron during anodic passivation in neutral solution. Thomas **1** 156
Accelerated corrosion; ——— of ship's bottom plate. Copenhagen... ... **1** 344
Aerosols; Chemical nature of chromium oxide———produced by heated 80 : 20 nickel-chromium alloy. Goldsmith & May **1** 323
Aircraft; Training for anti-corrosion maintenance of naval ———. Hammersley... ... ... **4** 231
Alkaline solutions; Inhibition of corrosion of iron in———. Gilroy & Mayne. **1** 161
Alloying constituents; Effect of———in aluminium on the corrosive attack by mercury. Beard & Hine... ... **1** 98
Alloys; Brazing ——— for marine service. Upton **1** 134
Factors affecting corrosion-resistance of high-temperature ——— in carburising gases. Lewis **3** 166
Note on a chemical modification of surface composition in ——— Clarke **3** 87
Resistance to stress-corrosion cracking of some Cr-Ni-Fe austenitic steels and ———.Truman & Perry **1** 60
Selection of ——— for multi-stage flash distillation plant. Bom... **5** 258
Aluminium; Anodic behaviour of ——— and its alloys in alkaline media in the presence of inhibitive and complexing substances Kapali *et al.* **4** 305
Behaviour of ——— in alkaline and neutral tatrate and citrate solutions. Subramanyan & Yamuna ... **4** 32
Corrosion behaviour of ——— in fresh waters with special reference to pipelines. Booth *et al.* **1** 80
Corrosion of ——— literature review 1965–1967. Tapper **3** 285
Corrosion of ——— in solutions of sodium fluoride and sodium chloride. Lorking & Mayne **1** 181
Corrosion of mechanical joints in ——— and ——— -steel structures. Booth **2** 55
Effect of acidic gelatinous materials on pitting corrosion of ——— hollowware. Penn & Murray **2** 193
Effect of alloying constituents in ——— on the corrosive attack by mercury. Beard & Hine **1** 98
——— in fresh waters. Bell & Campbell **1** 72
Influence of cupric ions on the behaviour of surface-active agents towards ———. Frazer & Langstaff **2** 11
Isolation of ——— anodic oxide films from metal substrate. Campanella **2** 219
Performance of silicate inhibited cleaning agents in contact with ———. Skerrey **1** 303
Protection of ——— in storage in transit. Scott & Skerrey **5** 239
Role of iron in ——— on the initiation of pitting in water. Murray *et al.* ... **2** 216
Aluminium alloys; Behaviour of anti-freeze solutions in a simulated ——— engine test rig. Glover *et al.* **2** 209
Effect of shot-peening on stress-corrosion properties and stress distribution in ——— D.T.D. 5054. Hawkes **3** 258
Fretting corrosion products of ———. Andrew *et al.* **3** 85
Five-year corrosion of ——— at several marine sites. Ailor **1** 237
Morpholine as a corrosion inhibitor for ——— in hydrochloric acid. Desai *et al.* **4** 315
Protecting strong ——— against stress-corrosion with sprayed metal coatings. Carter & Campbell ... **4** 15
Anions; Adsorption of ——— on iron during anodic passivation in neutral solution. Thomas **1** 156
Anions, aggressive; Comparative study of factors influencing the action of corrosive inhibitors for mild steel in neutral solution. IV. Mechanism of action of mixed inhibitive and ———. Brasher *et al.* **3** 144
Stability of the oxide film on metals in relation to inhibition of corrosion. I. Mild steel in presence of ———. Brasher **2** 95
Anions, inhibitive; Anodic passivation of iron in solutions of ———. Thomas & Nurse **2** 13
Anodic behaviour; ——— of tin in potassium hydroxide solution. Hampson & Spencer **3** 1
——— of zinc in potassium hydroxide solution. II. Horizontal anodes in electrolytes containing Zn (II). Hampson *et al.* **4** 207
Anodic dissolution; ——— of copper-zinc alloys in alkaline solutions. Wilde & Teterin **2** 125
Anodic passivation; ——— of iron in solutions of inhibitive anions. Thomas & Nurse **2** 13
Anodic protection; ——— for the control of corrosion fatigue. Cowley *et al.* **3** 223
Antifreeze; Behaviour of ——— solutions in a simulated aluminium alloy engine test rig. Glover *et al.* **2** 209
Antifreezes; Behaviour of four ethylene glycol ——— in car tests. Weibull... **1** 255
Aqueous conditions; Fast linear growth of magnetite on mild steel in high-temperature ———. Potter & Mann **1** 26
Arsenate; Cathodic inhibition of the corrosion of mild steel in phosphate, tungstate, ——— and silicate solutions containing Ca^{2+} ions. Szklarska-Smialowska & Mankowski **4** 271
Arsenic; Mechanism of dezincification and effect of ———. I. II. Lucey **1** 9, 53
Atmospheric conditions; Corrosion-resistant low-alloy steels: a review with particular reference to ——— in the United Kingdom. Chandler & Kilcullen **5** 24
Atmospheric corrosion; ——— resistance of electrodeposited tin-cadmium and tin-zinc coatings on steel. Cooke *et al.* **1** 28
Use of environmental data in ——— studies. Stanners **5** 11
Atmospheric exposure; ——— trials of electrodeposited iron-zinc alloy coatings. Salt *et al.* **5** 2
Autoclave jackets; Corrosion of ——— subjected to a steam–water cycle. Cowley *et al.* **2** 15
Autoradiography; Note on ———— its use in examining the inhibition of corrosion. Mayne & Page **5** 9

B

Bacteria; Polarisation of mild steel in the presence of hydrogen ——— and methane ———. Booth *et al.* ... **3** 6
Corrosion of mild steel by sulphate-reducing ———: an alternative mechanism. Booth *et al.* **3** 24
Corrosion of mild steel by actively growing cultures of sulphate-reducing ———. Influence of ferrous iron. Booth *et al.* **1** 34
Benzotriazole; ——— and related compounds as corrosion inhibitors for copper. Cotton & Scholes **2** 1
Blast-cleaning; Assessment of surface profile after ———. Chandler & Shak **1** 30
Optimum conditions for ——— of steel plate. Remmelts ... **3** 88; **4** 19
Boilers; Some effects arising from the presence of copper in ——— during chemical cleaning. Pearce & Parkins **3** 7
Brass; Establishment and growth of zinc oxide on 74 : 26. ——— Whittle & Wood **3** 29
Stress-corrosion cracking of alpha——— in $CuSO_4/(NH_4)_2SO_4$ solution. Lahiri **3** 28
Inhibition of the corrosion of 63/37 ——— in nitric acid. Desai *et al.* ... **4** 30
Brazing; ——— alloys for marine service. Upton **1** 13
Bridges; Protection of steel ——— from corrosion. Smith & Day **5** 15
Building; Recognition of corrosion hazards to metals in ———. Everett & Tarleton **2** 61

C

Carbides; CARBOX—A computer programme for the numerical evaluation of equilibria involving CO–CO_2–H_2–H_2O–CH_4 mixtures and non-stoicheiometric oxides and ———. Hyam & Timperley... ... ... **4** 26
Carbon dioxide; Effect of moisture on the oxidation of mild steel and low-alloy steel in ———. Stevens & Board **4** 80

Influence of gas pressure on the long-term oxidation behaviour of mild and low-alloy steels in ——— atmospheres at 350–450°C. Goodison *et al.* **4** 293
Oxidation of austenitic stainless steel boiler tubing in ———. Board & Winterbourne **4** 86
Oxidation of rimming steels in ——— atmospheres. Goodison & Harris ... **4** 146
Oxidation behaviour of some nickel base alloys in ——— at 900°–1000°. Antill *et al.* **1** 277
Oxidation and carburisation of a 20/25/Nb steel in ———, in carbon monoxide and in ———/carbon monoxide mixtures. Jepson *et al.* ... **1** 15
Variability in ——— oxidation resistance of 2¼ Cr 1 Mo and 1 Cr ½ Mo steels. Harris & Menzies **3** 34
Carbon disulphide; Dithiocarbamates, ——— and the corrosion of tinplate. Board *et al.* **3** 238
Carbon monoxide; Oxidation and carburisation of a 20Cr/25Ni/Nb steel in carbon dioxide, in ——— and in carbon dioxide ——— mixtures. Jepson *et al.* **1** 15
Car; Behaviour of four ethylene glycol antifreezes in ——— tests. Weibull **1** 255
CARBOX; ——— a computer programme for the numerical evaluation of equilibria involving CO-CO_2-H_2-H_2O-CH_4 mixtures and non-stoicheiometric oxides and carbides. Hyam & Timperley **4** 260
Carburisation; Note on transport in porous scales and the simultaneous oxidation and ——— of stabilised steels in carbon dioxide. Birks ... **3** 56
Oxidation and ——— of a 20Cr/25Ni/Nb steel in carbon dioxide, in carbon monoxide and in carbon dioxide — carbon monoxide mixtures. Jepson *et al.* **1** 15
Cathodic inhibition; ——— of the corrosion of mild steel in phosphate, tungstate, arsenate and silicate solutions containing Ca^{2+} ions. Szklarska-Smialowska & Mánkowski ... **4** 271
Cathodic protection; ——— a review. Morgan **5** 237
——— of water-line areas. Holland & Sawyer **1** 267
Chloride solutions; Influence of movement and temperature on the corrosion of mild steel. III. ———. Butler & Stroud **1** 110
Chromate solutions; Influence of surface preparation on the kinetics of film growth on mild steel in ———. Brasher & Beynon **2** 195
Chromium; Electrochemical assessment of ——— in passivation films on tinplate. Britton **1** 91
Chromium oxide; Chemical nature of ——— aerosol produced by heated 80 : 20 nickel-chromium alloy. Goldsmith & May **1** 323
Chronopotentiometry; Solid electrode ——— for studying the reaction of erythrosin on tinplate. Board *et al.* **3** 31
Citrate; Behaviour of aluminium in alkaline and neutral tartarate and ——— solutions. Subramanyan & Yamuna **4** 32
Cleaning agents; Performance of silicate inhibited ——— in contact with aluminium. Skerrey... ... ... **1** 303
Coal tar; ——— base frictions as pickling inhibitors in hydrochloric and sulphuric acid solutions. Hudson *et al.* **2** 81
Coatings; Atmospheric corrosion resistance of electrodeposited tin-cadmium and tin-zinc ——— on steel. Cooke *et al.* **1** 283
Atmospheric exposure trials of electrodeposited iron-zinc alloy ———. Salt *et al.* **1** 5
Protecting strong aluminium alloys against stress-corrosion with sprayed metal ———. Carter & Campbell **4** 15
Isolation of the ——— layers of tinplate. Britton & Hancox **1** 120
Note on the peeling of the zinc layer in galvanised ———. Hershmann & Neemuchwala **1** 51
Pruners for sprayed aluminium and zinc ——— on steel. Stanners & Watkins **1** 17
Concrete; Anodic polarisation measurements of corrosion and corrosion inhibition of steel in ———. Gouda. **1** 138
Coolants; Five-year service test on borax-based corrosion inhibitor in car engine ———. Dulat **3** 190
Copper; Benzotriazole and related compounds as corrosion inhibitors for ———. Cotton & Scholes **2** 1
Mechanism of pitting corrosion of ——— in supply waters. Lucey ... **2** 175
Some effects arising from the presence of ——— in boilers during chemical cleaning. Pearce & Parkins ... **3** 70
Copper alloys; An electro-chemical study of ——— in chloride solutions. Giuliani & Bombara ... **5** 179
Copper-zinc alloys; Anodic dissolution of ——— in alkaline solutions. Wilde & Teterin **2** 125
Copper tubes; Pitting corrosion in ——— — cause of corrosion and counter-measures. Mattsson & Fredriksson **3** 246
Corrosion; ——— and other causes of failure of electric immersion heater elements in New Zealand. I. II. Schafer & Dall **3** 12 20
Forty years of research on ——— by the British steel industry: the work of the ——— Committee, 1928–1968. Hudson **3** 161
Survey of ——— and atmospheric pollution in and around Sheffield. Chandler & Kilcullen ... **3** 80, 305
Anodic polarisation measurements of ——— and corrosion inhibition of steel in concrete. Gouda **1** 138
——— behaviour of aluminium in fresh waters with special reference to pipelines. Booth *et al.* **1** 80
Five-year ——— of aluminium alloys at several marine sites. Ailor ... **1** 237
Influence of movement and temperature on the ——— of mild steel III. Chloride solutions. Butler & Stroud **1** 110
Influence of salts in rusts on ——— of underlying steel. Chandler **1** 264
——— in fused salts. Inman & Wrench **1** 246
———. Literature review. Cotton *et al.* **1** 123
Literature survey–1965. Cotton *et al.* **1** 327
——— literature review. Stanners *et al.* **2** 242
——— of aluminium in solutions of sodium fluoride and sodium chloride. Lorking & Mayne **1** 181
——— of cast iron in concentrated sulphuric acid under potentiostatic conditions. Maahn... ... ... **1** 350
——— of mild steel by actively growing cultures of sulphate-reducing bacteria. Influence of ferrous iron. Booth *et al.* **1** 345
——— of iron in alkaline solutions. Gilroy & Mayne **1** 161
——— of iron in the pH range 6–9. Gilroy & Mayne **1** 107
Corrosion and protection; Role of academic institutions in spreading knowledge of ———. Shreir ... **5** 11
Corrosion; Exfoliating ——— of cupronickel feed-water heater tubes. Castle *et al.* **1** 143
Corrosion, grain boundary; Some aspects of the influence of structure upon stress-corrosion cracking and ——— in mild steels. Henthorne & Parkins **2** 186
Corrosion, intergranular; Effect of increased nickel content on ——— of alloy 20 Cb. Scharfstein & Maniar **1** 36
Corrosion fatigue; Anodic protection for the control of ———. Cowley *et al.* **3** 223
——— behaviour of Al-Mg alloys. Panseri *et al.* **1** 270
——— in high carbon steel. Rollins *et al.* **5** 33
Stress distribution in a ——— specimen. Stanley... ... ... **4** 39
Corrosion, microbiological; ——— of tanks in long-term storage of gas oil. Roberts **4** 318
Corrosion rates; Use of pulsed applied voltage in the derivation of ——— from polarisation resistance measurements. Rowlands & Bentley ... **2** 92
Corrosion-resistant fasteners; a review. Layton & White **1** 213
Corrosion testing apparatus; Practical applications of ——— under heat-transfer conditions. Moore & Smith **2** 143
Corrosive attack; Effect of alloying constituents in aluminium on the ——— by mercury. Beard & Hine **1** 98
Crack initiation; Nature of stress-corrosion ——— with martensitic stainless steels. Truman *et al.* ... **1** 360
Cracks; Propagation of stress-corrosion ——— in austenitic stainless steel. West & Fairman **1** 67
Cracking; Characteristics of transgranular stress-corrosion ———. Scully **1** 355
Note on the effect of testing temperature on the stress-corrosion ——— of martensitic stainless steels. Truman & Perry **1** 369
Resistance to stress-corrosion ——— of some Cr–Ni–Fe austenitic steels and alloys. Truman & Perry ... **1** 60
Stress-corrosion ——— of high-purity iron in ammonium nitrate solution. Flis **3** 182

Stress-corrosion ——— of alpha brass in $CuSO_4/(NH_4)_2SO_4$ solution. Lahiri 3 289
Transgranular ———. Howard & Pyle 3 301
Some aspects of the influence of structure upon stress-corrosion ——— and grain boundary corrosion in mild steels. Henthorne & Parkins 2 186
Cupric ions; Influence of ——— on the behaviour of surface-active agents towards aluminium. Frazer & Langstaff 2 11
Cupro-nickel; Exfoliating corrosion of ——— feed-water heater tubes. Castle *et al.* 1 143

D

'Deposit corrosion'; Study of ——— of stainless steels in aggressive atmospheres. Agabio & Tamba 5 112
Dibenzylsulphide; Inhibitive action of dibenzylsulphoxide and ———. Trabanelli *et al.* 4 267

Propagation of ——— cracks in austenitic stainless steel. West & Fairman 1 67
Protecting strong aluminium alloys against ——— with sprayed metal coatings. Carter & Campbell ... 4 15
Resistance to ——— cracking of some Cr–Ni–Fe austenitic steels and alloys. Truman & Perry 1 60
Sulphate; Thermodynamics of iron-fused ——— systems. Baudo & Tamba 4 129
Sulphide inclusions; Electron microprobe study of the effect of ——— on the nucleation of corrosion pits in stainless steels. Szklarska-Smialowska *et al.*... ... ... 5 159
Sulphide staining; ——— inside tinplate cans and its prevention. Rocquet & Aubrun 5 193
Sulphide stains; Analysis and constitution of ——— on tinplate. Evans & Gabe 3 105
Sulphoxides; Correlation of the structure and the inhibitive action of some ———. Trabanelli *et al.* ... 4 212
Surface-active agents; Influence of cupric ions on the behaviour of ——— towards aluminium. Frazer & Langstaff 2 11
Surface composition; Note on a chemical modification of ——— in alloys. Clarke 3 87
Surface oxides; Structure of ——— formed on a 20% Cr/25% Ni/Nb-stabilised steel in carbon dioxide at high temperatures. Francis ... 3 113
Surface profile; Assessment of ——— after blast-cleaning. Chandler & Shak 1 307

T

Tanks; Microbiological corrosion of ——— in long-term storage of gas oil. Roberts 4 318
Tartrate; Behaviour of aluminium in alkaline and neutral ——— and citrate solutions. Subramanyan & Yamuna 4 32
Temperature; Fast linear growth of magnetite on mild steel in high ——— aqueous conditions. Potter & Mann 1 26
Thermocouple; Embrittlement of nickel base alloys containing aluminium and chromium as used for ——— materials. Thomas & Meredith ... 1 189
Thermodynamics; ——— of iron-fused sulphate systems. Baudo & Tamba 4 129
Thiourea; Influence of ——— on the dissolution of mild steel in strong hydrochloric acid. Oakes & West ... 4 66
Thoria; Corrosion resistance of nickel/2·5% ——— alloy at elevated temperatures. Fontaine 4 154
Tin; Anodic behaviour of ——— in potassium hydroxide solution. Hampson & Spencer 3 1
Tin-cadmium and tin-zinc coatings; Atmospheric corrosion resistance of electrodeposited ——— on steel. Cooke *et al.* 1 283
Tinplate; Analysis and constitution of sulphide stains on ———. Evans & Gabe 3 105
Dithiocarbamates, carbon disulphide and the corrosion of ———. Board *et al.* 3 238
Electrochemical assessment of chromium in passivation films on ———. Britton 1 91
Inhibition of nitrate-induced corrosion of ——— cans. Board & Holland 4 162
Isolation of the coating layers of ———. Britton & Hancox ... 1 120
Sulphide staining inside ——— cans and its prevention. Rocquet & Aubrun 5 193
Triazoles; ——— as inhibitors of corrosion of mild steel in acids. Sathianandhan *et al.* 5 270
Tubes, heater; exfoliating corrosion of cupro-nickel feed-water ———. Castle *et al.* 1 143
Tungstate; Cathodic inhibition of the corrosion of mild steel in phosphate, ———, arsenate and silicate solutions containing Ca^{2+} ions. Skzlarska-Smialowska & Mánkowski ... 4 371

U

Uranium, Electrodeposited nickel as a protective coating for ——— in unsaturated air near ambient temperature. Owen & Alderton ... 5 217

W

Water-line areas; Cathodic protection of ———. Holland & Sawyer ... 1 267
Water-soluble species; Release of ——— from the oxides formed on 20% Cr/25% Ni/Nb-stabilised steel. Robins *et al.* 5 46
Water treatment; ———: an account of work at the former National Chemical Laboratory. Wormwell ... 2 (
Water; Corrosion of mild steel in the ——— of the Thames estuary. III. Results of 3 and 5 years' immersion. Booth *et al.* 2 22
Waters, fresh; Aluminium in ———. Bell & Campbell 1 7
Corrosion behaviour of aluminium in ——— with special reference to pipelines. Booth *et al.* 1 8
Waters, supply; Mechanism of pitting corrosion of copper in ———. Lucey 2 17
Waters, tidal; Corrosion of mild steel in ——— of the Afon Dyfi and a comparison with the River Thames. Booth *et al.* 2 2
Welding; Practical corrosion problems in relation to welded joints. I. Special characteristics of the ——— process which can cause corrosion problems. Baker & Whitman ... 2 3
Wüstite; Note on the temperature stability of ——— in surface oxide films on iron. Bruce & Hancock. ... 4 22

Z

Zinc; Anodic behaviour of ——— in potassium hydroxide solution. II. Horizontal anodes in electrolytes containing Zn(II). Hampson *et al.* 4 20
Corrosion of ——— by vapours from polyester resins. II. Prevention of corrosion. Cawthorne *et al.* ... 4 3
Corrosion of ——— — literature review 1965–1967. Porter 3 28
Note on the peeling of the ——— layer in galvanised coatings. Hershmann & Neemuchwala 1 5
Painting of ——— surfaces. Porter ... 4 17
Zinc oxide; Establishment and growth of ——— on 74 : 26 brass. Whittle & Wood 3 29
Zircaloy-2, corrosion of; Influence of surface preparation and fluorine contamination on the ——— in water and steam. Sietnieks & Östberg 3
Zirconium alloys; Effects of alloying and irradiation on the oxidation behaviour of ———. Campbell & Tyzack 5 17

BRITISH CORROSION JOURNAL
